ABOUT

I build web apps with Next.js and React — that's where I do my best work. Over the past few years I've shipped production applications for clients, built internal tools and dashboards, and worked across the stack from component architecture to Express backends. I care about writing clean code, but I care more about shipping something that actually solves the problem.

I've done everything from converting Figma designs into pixel-perfect UIs to building data pipelines and student tracking systems. Currently focused on the React and Next.js ecosystem, and always looking for interesting problems to work on.

EXPERIENCE

Full-Stack Developer | AFDV Marketing | Jan 2023 – Jul 2023

- Built a full-stack e-commerce platform using Next.js on the frontend, integrated with an existing Django backend.
- Converted Figma design mockups into a responsive, production-ready event calendar in React.
- Developed a custom internal CMS that streamlined content management and daily operations for the team.
- Led frontend architecture while collaborating directly with backend developers on the Python stack.
- Optimized client-side rendering and data-refresh flows for smoother user interactions.

Full-Stack Developer | Islamic Educational Institution (NDA) | 2023 – Present

- Built a student progress tracking platform serving active students with weekly performance monitoring.
- Developed a Telegram scraper to automatically collect assignments and lecture data from group channels.
- Created an Excel data processing tool for importing, editing, and exporting weekly student progress reports.
- Building a daily tracking tool and unified dashboard for supervisors to monitor student performance across the program.
- Tech: Next.js (migrating to React Native), Express.js, Telegram Bot API, data processing pipelines.

Freelance React Developer | Upwork | Apr 2022 – Present

- Converted PSD designs to responsive HTML/CSS/JavaScript for a content calendar app with real-time API integration.
 - Integrated a JavaScript library into a Next.js project, handling communication between the library and the framework.
 - Focused on code modularity, responsive design, and delivering clean, bug-free work across client projects.
-

PROJECTS

Quote Vault — Personal Quote Manager

Full-stack app for organizing quotes with multi-language support. Features passwordless auth via NextAuth.js, Server Actions with Prisma ORM for end-to-end type safety, and a responsive interface with dark/light mode plus English/Arabic support.

Tech: Next.js 14, TypeScript, PostgreSQL, Prisma, NextAuth.js, Tailwind CSS, ShadCN/UI, i18next
[GitHub](#) · [Live Demo](#)

Personal Portfolio & Blog

My personal site with an integrated blog. Minimal, clean, and built to showcase my work.

Tech: TypeScript, Next.js, Contentful CMS

E-commerce Frontend (Sprint Project)

Team project where I led the frontend of an e-commerce application, integrating with backend services built by a teammate. Focused on component structure, state management, and a clean shopping experience.

Tech: React, JavaScript, REST API integration

[GitHub](#)

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks: React, Next.js, React Native, Tailwind CSS, ShadCN/UI

State & Data: Context API, Redux, Prisma, Supabase (PostgreSQL)

Backend: Node.js, Express.js, REST APIs, Strapi, Django (integration)

Tools: Git, GitHub, Vercel, VS Code, Claude Code

EDUCATION

Benha University — Bachelor's Degree, Nursing (2018 – 2022)

CERTIFICATES

- React Development Cross-Skilling — EGFWD | Udacity
- Advanced Full-Stack Web Development — EGFWD | Udacity
- Front End Web Development Professional — EGFWD | Udacity
